

Fax broadcast – one fax, many recipients

*Professional broadcast of your
information and special offers to
all of your customers.*

*No monthly fees,
easy to handle*

Flexible to use

Your own sender ID

Detailed log files

Why GTC

GTC Fax broadcast enables you to start your fax-mailings just by pushing a button. Without investments or installations: access to the internet will do! The transmission is carried out via our high-performance systems – of course **with your own sender- ID**. After each broadcast you profit from detailed statistics plus transmission reports containing **all feedback**.

No time? No problem: we will take care of everything for you! Just call or email!
Our friendly customer service will be pleased to help you!

Fax broadcast – so easy

*Inform your customers with regular faxes – **cost saving** and within minutes. You can quickly react to market movements and you're always one step ahead of your competitors.*

Our customer advisors will help you - with questions or the complete processing of your orders.

Prepare

- + Preparing broadcasts in the protected customer area - **24/7**
- + Definition of **sender identification, header and start time**
- + **Personalization** of the fax or the header
- + Alternatively **order transmission by e-mail or FTP** - our customer consultants do everything

Send and Evaluate

- + Free **block of duplicate** fax-numbers and comparison with the German **Fax-Robinson** list and own blocking lists
- + Dispatch of large volumes **without lead time** via redundant dispatch systems
- + **Automatic redialing** in busy situations
- + **Forwarding service** on request - e. g. the next day
- + Protected customer area with **overview of all mailings**
- + Download possibility for **detailed dispatch protocols** with all fields of the original distribution list and the detailed dispatch information
- + Detailed **dispatch statistics** with information about **success rate and error distribution**
