

Web-SMS – direct messaging from

*Delivery notifications or
appointment information
directly via SMS*

*no installation,
easy handling*

Flexible to use

Detailed log files

Via Mail or API

Why GTC

With Web-SMS you can easily create single or multiple messages on your PC and send them via SMS to your customer. You can also make use of an automated connection – in case of a server downtime your technicians will be automatically informed.

No time? No problem: we will take care of everything for you! Just call or email!

Our friendly customer service will be pleased to help you!

Web-SMS – easy to handle

*Makes sure you reach your recipients wherever they are - without having to type a single word into your mobile phone. You comfortably **enter your message on your PC** – your recipient gets it directly as a text message on his phone - That's how you inform your clients e.g. about completed repairs.*

Online customer area

- + Secure customer area – **24 / 7**
- + Select contacts directly from your address book
- + Order list including all transmitted SMS messages and their status
- + Send you Web-SMS with your **individual ID**
